### Make the move to a financial management system with the functionality and accessibility you demand!

Microsoft Dynamics® GP is a richly featured financial accounting and business management solution that allows you to use familiar, powerful software to operate and grow your business. You can choose from the Business Essentials (plus) and Advanced Management (plus) editions of pre-selected software modules available for Microsoft Dynamics GP, and add modules to complete your business management solution.

### Software as a Service

Software as a Service (SaaS) has quickly become a compelling and credible delivery model for business applications, allowing businesses to focus on their core business operations instead of managing an IT department. myGPcloud provides users with a secure, reliable, Sarbanes-Oxley (SOX) compliant application that can be accessed in the cloud 24/7/365. With our 99.5% Service Level guarantee and 24/7 connectivity support, we can provide users the reliability and support they demand. And with myGPcloud's immediate "on-demand" solution, we take it to the next level by empowering our prospects to begin using Microsoft Dynamics GP within just a few minutes.

### Affordable ERP On-Demand

myGPcloud is offered on a monthly subscription basis with no annual contracts, upfront or setup fees of any kind. Upgrades, service packs and normal software updates are included in your monthly hosting fees. Tutorials for learning and videos to help you get started are included as part of your monthly hosting fees. And as an added benefit we include the latest versions of Microsoft Word and Excel for your use.

### Faster Time to Deploy

Simplify the implementation processes with a solution that is provided on-demand and pre-configured with a useful Charts of Accounts and pre-formatted Financial Statements and begin using your Microsoft Dynamics GP application in minutes. There is no hardware or software to install, just click through the simple connectivity instructions and you will be given a secure database for immediate use in minutes. No sales process, no waiting for someone to call you back!

### Power of Choice for Your Future

With myGPcloud you never have to worry about your data and what the future holds for your company. Need to move out of the cloud? Not a problem, the data is yours and is accessible with a single user install. Want to move on-premise? Not a problem! We can transfer your data, customizations, and predefined setups to an on-premise version of Microsoft Dynamics GP seamlessly and with no hassles or data re-mapping.

## Our Performance Assurance

We understand that if you are going to run your business using myGPcloud, you need assurances around the performance, availability and security of the solution. To ensure confidence and trust, we have made significant investments in processes, resources, and technology, including:

- Guaranteed 99.5% or greater system availability
- System hosted in tier-one SAS70 Type II certified data centers
- An operations team that monitors and manages the system 24x7x365
- High availability/failover capabilities
- Data backed up and stored in multiple geographic locations
- Secure socket layer (SSL) to ensure secure end to end communications

## Accommodating Your Future Growth

We recognize that our customers are unique and diverse in their specific application needs, therefore we provide each customer with a growth path which will enable them to continue to increase and expand on the core functionality of Dynamics® GP On-Demand. If your company's growth plans include the need to integrate with externally created systems or industry specific applications, we have a dedicated service plan in place with your expansion in mind. We will expertly move your database including any customizations with minimal downtime from our multi-tenant environment to a dedicated server platform which will allow you to integrate and grow your application even further. Customers who migrate to our dedicated environment experience growth in the following areas:

- Ability to procure additional Microsoft Dynamics GP a la carte modules
- Integration to solutions for Sales Tax calculation and reporting
- Integrations to other CRM applications such as Salesforce.com
- Integration to Microsoft Office SharePoint Services
- Integration to Point of Sales applications
- Extensive storage needs for document imaging and storage

## The Support of the Partner Channel

Like to work more closely with an authorized partner in your area? myGPcloud will help you find the right Microsoft Certified Partner in your area with the expertise and locality you need. Or visit our webpage and click on Support to find a partner near you.
